

1.

The screenshot shows the GitHub repository page for **VFA22SCM94P / SCM587FA22**. The repository is private and forked from **SPM587FA22/SCM587FA22**. The main branch is selected, showing it is 1 commit ahead of the upstream. The commit history shows a series of commits, including fixes and updates to various files like `Phase1_Report`, `Phase2_Report`, `.gitignore`, `README.md`, and `a.java`. The file list on the right shows the repository structure, including `Phase1_Report`, `Phase2_Report`, `.gitignore`, `README.md`, and several Java files.

2.

The screenshot shows the commit history page for the repository **VFA22SCM94P / SCM587FA22**. The page displays a list of commits, including the commit hash, commit message, author, and the time since the commit was made. The commits are listed in descending order of time. The commit messages include fixes, updates to reports, and updates to Java files. The commit hashes are displayed in a truncated format, and the commit messages are truncated as well. The page also shows the commit history for the main branch.
